"If Khrushchev thinks he can capitalize on the incident of the U-2--with all the questions it raises and the clumsiness with which it had been handled--in order to throw the free world off balance, he has still a great deal to learn."

This is the straightforward warning that Harry S. Truman gives to the Soviet premier in an article appearing exclusively in (name of paper).

The former president--who sent U.S. troops to Korea to stop Soviet aggression in 1950--tells Khrushchev that he is mistaken if he assumes he can "frighten or bully the West into surrender on his terms as a price for co-existence with him..."

This timely, hard-hitting analysis of recent international developments will be read with interest by millions of free world citizens.
